

Public beta · Live product

The AI summarizer that turns sources into understanding

Summify helps students and knowledge workers go from PDF, PowerPoint, YouTube, or article to structured summary, Learn cards, and optional audio — in one workspace.

www.summify.app EdTech · AI learning B2C SaaS + Scholar

Summaries are everywhere. Learning still breaks.

Students and professionals drown in long documents and lectures. Generic AI chat tools return flat bullet lists — then leave people alone to turn insight into retention.

Information overload

PDFs, decks, YouTube lectures, and articles pile up faster than anyone can review with attention.

One-shot tools

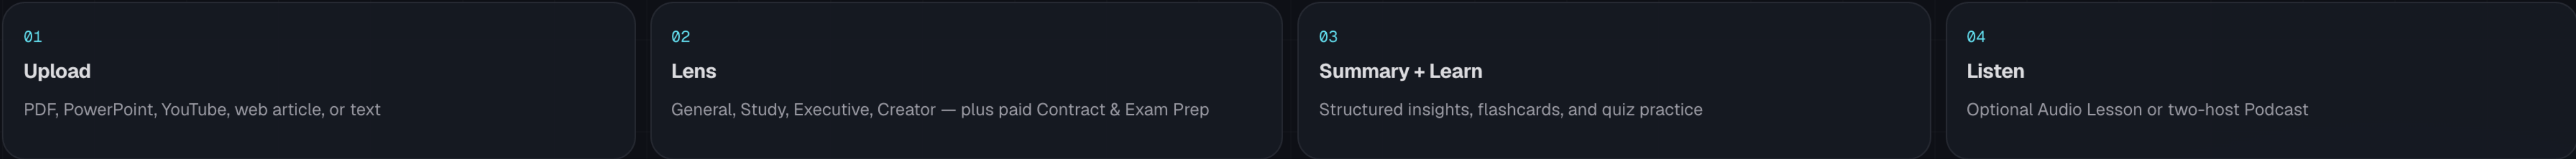

Most summarizers stop at text. No study cards, no quiz loop, no listen-back path from the same source.

Retention gap

Without active recall and multi-format reinforcement, “I summarized it” rarely becomes “I know it.”

One upload. A complete learning loop.

Summify is an AI summarizer workspace: structured intelligence first, then Learn cards and quizzes — with optional teacher-style audio and podcast discussion when users are ready.

Built for real study workflows

Live at summify.app — free to try, account to save, paid tiers for audio depth and higher limits.

Document IQ

Source complexity signals that guide how users study the material.

Intelligence lenses

Same pipeline, different emphasis — Study for students, Executive for decision-makers.

Learn layer

Grounded flashcards and quizzes from the analysis — not generic chat fluff.

Audio Study

Teacher-style lessons and podcast discussions after the summary path.

CORE PROMISE

We don't stop at "here's a summary."

Summify keeps the thread: understand → practice → listen — always from the same source, so users spend less time reformatting and more time retaining.

- Guest try → sign-in to save
- Workspace history & shareable outputs
- Privacy-minded processing (no private training on user uploads)

A large market at the intersection of AI + learning

Demand is shifting from “chat with a model” to durable study systems that respect attention, commuting time, and exam cycles.

TAM

Global AI education & productivity tooling — learners and knowledge workers who consume long-form digital sources daily.

SAM

English-first students and self-learners who already use AI summarizers, note apps, and YouTube lectures for coursework and upskilling.

SOM

Near-term focus: students (.edu Scholar), exam prep, and individuals converting PDFs/YouTube into Summary → Learn → Audio loops.

Students

Lectures, papers, exam prep

Researchers

Papers → structured review

Creators

Long-form → talking points

Professionals

Decks & docs → briefings

Freemium SaaS with a student wedge

Subscription revenue. Free converts curiosity; Scholar and Pro monetize depth and audio.

Free · \$0 • 5 analyses / day • Summary + Learn + Quiz • 4 core lenses	Scholar · \$4.99/mo • .edu email required • Higher limits + audio • Contract & Exam Prep	Pro · \$7.99/mo • Unlimited fair-use analyses • Unlimited audio & podcast • Mind maps & spaced repetition	Team · \$24.99/mo • Up to 5 seats • Shared workspace path • Pro-level intelligence
--	--	---	--

Billing via Polar. Annual plans available (~33–37% savings). Unit economics improve as Gemini/Vertex inference and caching efficiency scale with Google Cloud credits.

Public beta with a shipping product

We prioritize product truth over vanity metrics. The application surface is live, indexable, and usable end-to-end today.

Live product

- www.summify.app in production
- Upload → analyze → Learn → audio path
- Auth, dashboard, share flows

Go-to-market underway

- SEO landing pages by format & use case
- Student / Scholar positioning
- Product Hunt–ready public beta narrative

Next 90 days

- Deepen Gemini / Vertex alignment
- Grow .edu Scholar conversion
- Instrument retention & paid activation

Not another chat box — a study system

CAPABILITY	CHATGPT / GENERIC AI	NOTEBOOKLM-STYLE	CLASSIC SUMMARIZERS	SUMMIFY
Multi-format upload workspace	Partial	Strong	Limited	Yes
Structured summary + lenses	Prompt-dependent	Source Q&A	Summary-first	Yes
Learn cards + quiz loop	Manual	Limited	Rare	Built-in
Audio / podcast after summary	Separate tools	Audio focus	Usually no	Optional, same source
Student pricing (.edu)	Varies	Consumer	Varies	Scholar tier

Positioning: **Summary first. Study next. Audio when you need it.** Competitors optimize for chat or for listening alone — Summify connects the full loop.

We scale on inference, trust, and reach

Google for Startups helps us harden AI quality, control costs, and accelerate student growth — with the infrastructure and mentorship an AI learning product needs.

- 1

Cloud & AI credits
Run and optimize Gemini / Vertex AI workloads for analysis, Learn generation, and audio pipelines with sustainable unit economics.

- 2

Technical mentorship
Guidance on retrieval quality, grounding, latency, and responsible AI for student-facing educational products.

- 3

Network & distribution
Access to founders, operators, and campus/education channels that accelerate Scholar adoption and product feedback loops.

- 4

What we bring
A live multi-format workspace, clear freemium monetization, and a focused thesis: AI that helps people remember — not just skim.

Let's build the learning layer for the AI era

From every source to lasting understanding

Summify is live in public beta. We're applying to Google for Startups to scale AI quality, student growth, and a product the world can trust for real learning — not disposable summaries.
